

Arne Staby, Scientific Director of CMC Project Planning & Management at Novo Nordisk A/S.

He obtained a Ph.D. in Chemical Engineering from The Technical University of Denmark in 1993, and after finishing his post-doc in 1995, he has been working with development of purification processes for recombinant proteins and peptides at Novo Nordisk A/S, both as scientist, specialist, project manager, and department head.

He has published and holds many papers and patents within industrial use of chromatography, and he frequently acts as oral presenter and session chair at international conferences, and as referee for international journals and in evaluation of Ph.D. theses. Current responsibilities include preparation and implementation of strategies within intellectual property rights, technology development and QbD.
